HEALTH ID

By Team No Name

INTRODUCTION

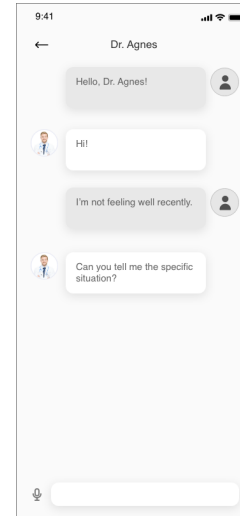

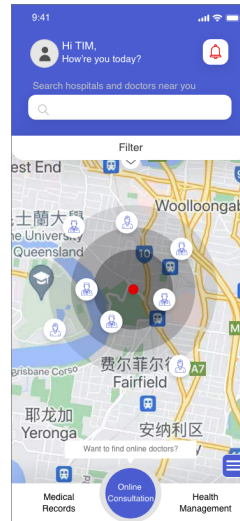

Health ID aims to help doctors and patients communicate effectively by improving diagnosis accuracy.

Health ID is a patient-oriented application that allows patients to store their own medical records online, and this app supports patients to share their medical records between different hospitals with information privacy protection.

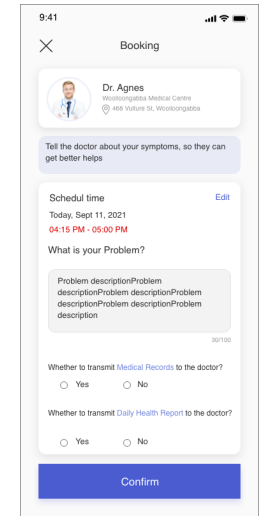

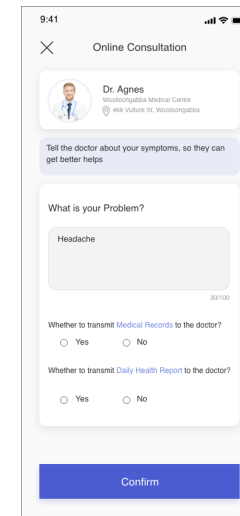

How to protect your privacy?
Only your authorised healthcare professionals can access your records according to roles and clinical needs on a "patient under care" and "need to know" basis.

FEATURES

ONLINE CONSULTATION
